

Sustainability Exposure Report

Third quarter 2019

Nordea 1 – European Stars Equity Fund

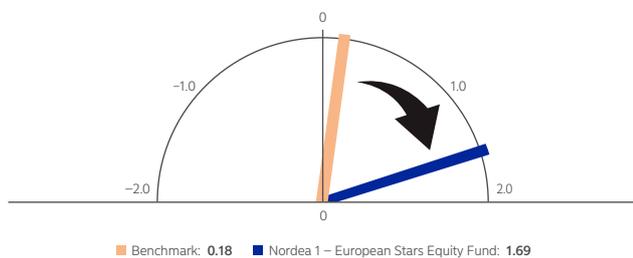

This report highlights how portfolio companies - through their products and services - have positive and negative impact on a total of 15 sustainability objectives which are closely aligned with the United Nation Sustainable Development Goals. The results are then compared with the benchmark. While engagement is always Nordea Asset Management preferred approach, we have made a corporate-level decision to exclude certain stocks, sectors, and practices across our entire active fund range. We have therefore banned investment in companies active in the production of illegal or nuclear weapons, including cluster munitions and anti-personnel mines, as well as companies involved in the maintenance of nuclear weapons. In a similar fashion, none of our funds invest in companies deriving more than 30% of their revenues from coal (including metallurgical coal), more than 10% from thermal coal, or more than 10% from oil sand. Our detailed RI policy and our corporate exclusion list are publicly available at [nordea.com](https://www.nordea.com/en/sustainability/sustainable-business/investments/exclusion-list/). (<https://www.nordea.com/en/sustainability/sustainable-business/investments/exclusion-list/>)

Total net score (vs benchmark)

The chart below shows the contribution of the portfolio holdings products and services to both Environment and Social considerations compared to companies held in the benchmark.

The contribution of the portfolio to the 15 objectives (social and environmental) is significantly higher than the benchmark.

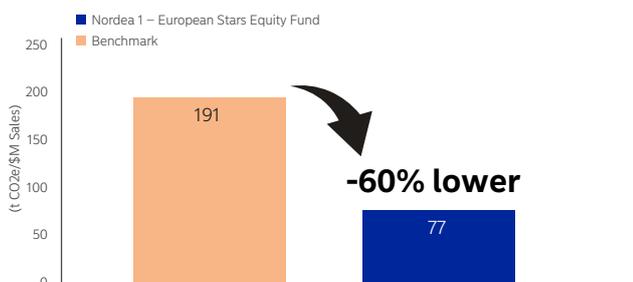

Portfolio's relative score compared to benchmark²⁾

²⁾ The relative score is calculated as follows: (Portfolio net score)/(Benchmark net score). Should the score of the benchmark be close to nil the relative score multiple might be distorted. **Comparison with other financial products or benchmarks is only meant for indicative purposes.**

Carbon footprint

The fund has a carbon footprint -60% lower than the benchmark.

Comparison with other financial products or benchmarks is only meant for indicative purposes.

Note: Scope 1 & 2. Data as at 30.09.2019. The carbon footprint metric relies on carbon data gathered by Nordea Investment Funds S.A., MSCI Inc. and is based on the Swedish Fund Association's recommendation. Portfolio Company highlight: Sanofi

Sanofi develops and produces pharmaceuticals which improve the quality of life and reduce the global disease burden. The company targets various disease areas such as rare diseases, cancer and diabetes. Sanofi generates 14.8% of sales (2018) with paediatric, influenza, meningitis and other vaccines, which are associated with high social benefits due to their ability to prevent illness. Sanofi is among the sector leaders when it comes to research into diseases affecting mainly developing countries (e.g. tuberculosis vaccines, leishmaniasis, sleeping sickness or malaria).

In addition, the company has a systematic approach to enhance access to health and various activities to promote affordability and availability are coordinated by a special department. Sanofi was founded in 1973 and is headquartered in Paris, France.

² Please note that the total sustainability score is the sum of the social and environmental scores and may slightly differ due to rounding differences. Should the benchmark score be negative the multiplier is calculated as follow: (Portfolio score + 1)/(Benchmark score + 1). Description of ISS-oekom methodology

This report highlights how portfolio companies - through their products and services - have positive and negative impact on a total of 15 sustainability objectives covering both Social and Environmental aspects. These objectives have been developed by ISS-oekom and closely aligned with the United Nation Sustainable Development Goals. The objectives include 7 Social and 8 Environmental objectives with scores ranging from -10 to +10. The results are then compared with the benchmark.

Please note that this report does not comment on the Governance aspect as we already report on such considerations in separate reports.

As the UN SDGs primarily target states and the public sector, not all of the goals are relevant for companies. For this reason, ISS-oekom defined a total of 15 sustainability objectives which are closely aligned with the SDGs. They are used to assess companies' product portfolios in terms of their contribution towards sustainable development based on their revenue weight. For each individual objective, a qualitative analysis is conducted to determine whether a product or service category contributes to or refrain from attaining the objective. As a result, the positive and negative effects of different product groups may partly cancel each other out within a given objective.

Further information on the company and the methodology is available at: <https://www.issgovernance.com/esg/impact-un-sdg/>

List of the 15 overarching sustainable objectives

7 social objectives

- Alleviating poverty
- Combating hunger and malnutrition
- Ensuring health
- Delivering education
- Attaining gender equality
- Providing basic services
- Safeguarding peace

8 environmental objectives

- Achieving sustainable agriculture & forestry
- Conserving water
- Contributing to sustainable energy use
- Promoting sustainable buildings
- Optimising material use
- Mitigating climate change
- Preserving marine ecosystems
- Preserving terrestrial ecosystems

Please note that each portfolio and benchmark are assigned a score ranging from -10 to +10 based on the above 15 sustainable objectives. For the approach to be meaningful and sound we have assumed that the minimum coverage at the fund level should at least be 60%. This means that for a fund score to be meaningful at least 60% of its holdings need to have a score.
